

## **THIS YEARS NEWS FROM STRING FURNITURE – STRING POCKET IN METAL**

**During Stockholm Design week *String Pocket metal* will launch – an updated version of the Sting Pocket shelf. The metal edition is an interpretation of Nisse Strinning last design, made by Anna von Schewen and Björn Dahlström. The metal shelf will be produced in the brand-new colour *Taupe*.**

The last collaboration between String Furniture and the design duo resulted in the *String Outdoor* assortment, launched in 2019. They designed new shelves in metal that fit in the iconic original panels designed by Nisse and Kajsa Strinning. The metal assortment grows even wider and will now be applied onto Nisses last design – *String Pocket*.

-It is incredible that the metal shelf develops even further in the design of a *String Pocket*. The perforated shelves make it possible to utilize all the accessories designed for the String System, and the shelf fits just as good in the kids' room as in the kitchen, says Anna von Schewen.

In conjunction with the launch of *String Pocket metal* a new colour is introduced. *Taupe* is a merge between brown and grey, carefully chosen by stylist Lotta Agaton and String Furniture's creative team with the mission of finding a colour that would harmonize with the existing colour palette.

Just like previous years, Anna von Schewen and Björn Dahlström have been part of the product development from start. The result was a new interpretation of the String Pocket that keeps the essence of Nisse Strinnings design from 2005, but with extended storage possibilities, says Peter Erlandsson, founder and co-owner of String Furniture.

String Pocket has, just like String System, the ability to follow its owner through all different stages in life since it can be adjusted and complemented in all ways possible to meet its owners' needs and requirements.

### **Product information String Pocket metal taupe**

Design: Nisse and Kajsa Strinning, Anna von Schewen and Björn Dahlström

Material: Powder coated panels, shelves in lacquered metal

Dimensions: W: 60 cm, H: 50 cm, D: 15 cm

### **About Kajsa & Nisse Strinning**

The architect and designer Nisse Strinning (1917-2006) is one of the 20<sup>th</sup> century's most interesting and ground-breaking Swedish designers. During the 1940s he was studying architecture at the Royal Institute of Technology in Stockholm, where he met the designer Kajsa Strinning (1922-2017). In

1949 they designed the String Shelf as a contribution to a competition, announced by publishing company Bonnier, that they later won.

## **About Anna von Schewen**

Anna von Schewen is educated at Konstfack in Stockholm and founded her own design studio in 1997. She has collaborated with several of Sweden's most renowned design brands and numerous international leading design brands. Anna von Schewen has won multiple architect and design awards and is known for being one of Sweden's most progressive and experimental designer. Anna von Schewen has designed products, interiors, exhibitions, private villas and furniture since 1997.

## **About Björn Dahlström**

Björn Dahlström is one of Sweden's leading designers and he founded his design studio in 1982. He has received several awards and he has designed a wide range of products such as furniture, bicycles, toys and kitchen utensils. His creations can be seen at various museums around the world such as the National Museum in Stockholm and the Victoria and Albert Museum in London.

## **About String Furniture**

String Furniture is a leading Scandinavian design company that produces the flexible and functional String® Shelving System – one of the most beloved design classics from the 20<sup>th</sup> century. Designed by Nisse and Kajsa Strinning in 1949. String Furniture collaborates with several award-winning designers, such as Anna von Schewen, Björn Dahlström, TAF and Mats Theselius. Sustainability is important for String Furniture and therefore they work towards having a fully Möbelfakta certified assortment, which is their contribution in making the furniture industry a bit more sustainable.
